

RAISING NOTE ACCEPTOR PERFORMANCE EXPECTATIONS

mei | SC advance™

CPI knows note acceptors. MEI is an integral part of that knowledge base. Since developing the world's first electronic, non-contact note acceptor, MEI products are relied upon for more than two billion transactions per week in over 100 countries.

Perhaps no other MEI product so ideally serves customer needs as well as the MEI SC Advance. Evolved from the winning MEI CASHFLOW SC note acceptor, SC Advance applies the latest technology and customer feedback to make a and kiosk machine performance once again.

SC Advance is designed to meet the demanding needs of retail cash management, whether in safes, cash deposit systems, gas pumps, security applications, self-checkouts or kiosks. It features enhanced recognition technology, faster note-to-note speed, improved barcode recognition and increased capacity to accept up to 100 different currencies and denominations. It also has the industry's best first-time acceptance rate for valid street-grade notes, including those that are damp, crinkled or torn.

The difference is apparent in the bottom line. By minimizing wear components and note jams and maximizing the fast acceptance of legal currency, SC Advance reduces maintenance costs and increases productivity—rewarding retailers with unparalleled returns.

Please contact your CPI sales associate to arrange a Value-added Trial (VAT) or learn how MEI SC Advance can help increase the bottom line in your operation.
